You can use this worksheet with the lesson Storyboard Superstar. [Add to collection to lesson plan](#) [Assign common core state criteria](#) Texas Basic Knowledge and Skills (TEKS) Virginia Learning Standards (SOL) BC Performance Standards Learning Program Australia Curriculum (ACARA) Storymap template to help you with your main character, settings. Help track the most important parts of the plot of the story, including major events, conflicts, and resolutions. Students typically use story map worksheets to visually organize elements of fiction creation. So they can follow the linear progression of the plot. Story Map Template What is a story map?Using a story map template is an effective strategy in the classroom to help students learn the building blocks of literature. Students can also create their own story map examples and use them as visual organizers to learn about other theme issues. Consider a regular map. We use them to see mountains, roads, water bodies, etc. around us. These maps make it easy to get to your destination without getting lost along the way. Printable publications in story maps behave the same way. After you read the story, you can start creating the story map to identify settings, main characters, and other elements of the story plot. There are several types of story maps that you can use to learn different levels. The simplest kind is just the beginning, middle and end of the story. However, if you want to create a more detailed map, you can include characters, features of these characters, conflicts, and other related elements. Students of all ages and levels can use story maps. It's up to teachers to show students how to create effectively. Once you've been assigned the assignment to create a story map template that prepares you to create a printable story map for your story map, your teacher should have already explained it. But if this is the first time, it may seem like an overwhelming task. Fortunately, you can download printable publications of story maps for free and use them as a reference. You may need to prepare for this task first, even if you use a pre-created story map worksheet or create your own. These include: find ideas and inspirations There are so many story map examples that you can use to find your own ideas and inspirations. These maps come from different individuals and they deal with various subjects. If you feel lost and don't know where to start, go online. Explore different websites to find templates and examples to help you move things around. Select a story map template

Whether to use downloaded filesIf you want to create a story map from the start, templates can be very helpful. With templates, you give the map a structure and you have to follow it. Again, you can download free story map templates and customize them as needed to make your tasks easier. Note that you can create a story map in two ways to start creating a map. First, you use a template to create it on your word process software, print it, and send it to your teacher. But if your teacher wants a more modern approach, you can start building story maps using the app. You can try several story map building apps. These are very easy to use, even without coding knowledge or skills. You don't have to install or download these apps, you're simply done using them while you're online, saving your work! This is a very useful feature, so you can learn how to create a map, no matter how simple, no matter how elaborate it is. These sites also give you ideas and inspiration. Also review samples and existing story maps created by other users. You can then borrow some ideas and use it for your own maps or simply as the basis for what you plan to build. Regardless of how you use it to create a map, you can enjoy it. Try to be as interesting as possible so that you can include all the elements of the story you read. When you're done with your work and you're confident, move on to the next step. Proofread your map Be sure to proofread it first before submitting or publishing a story map. Just a few spelling and grammatical errors, and you don't want your teacher to score points from your grades! Story Map Worksheets Tips for creating your own story map story map worksheets and apps are very popular. They have a visual and interactive nature and are an excellent medium for sharing interesting information about stories, topics, or places. You can also use them to start a discussion about real issues. When you create your own story map template, there are a few things to consider depending on the details of the map. Here are some tips for creating your own story map: If you want to communicate this message effectively, it's important to keep it as concise as possible. Select an individual topic and narrow it down to its basic message. From here, you can start planning the content of your map. Planning and executing a data strategy may seem like an intimidating thing to do, but it's actually not that much. When planning your data strategy, all you need to do isThe attributes and elements to include. Select only the most important information so that the map is not cluttered or complex. Before you begin this procedure, return to the requirements of the project. Read all the requirements to get a better understanding of what information to include and what information you don't need to be part of the story map. You can search online for templates that contain all the data you need. You can also download templates with different content and customize them according to your needs. You can also create an outline of the story map and use it as a structure and as a reference. Different stories and stories that try different templates can work well with different templates. For example, if you have a story map that guides your readers through different locations, we recommend that you use a map tour template to display this. Such templates cascade in such a way that they provide readers with guided stories using different maps, multimedia and photos. The content in the story map is already planned, so you can try it out using a different template. If you find one that works, stick with it. Keep things simple It is never a good idea to overwhelm the reader with too much information. It is better to walk the reader through the map without trying to clutter the map. For digital story maps, make sure your readers don't interact with pop-ups or other types of tools often. In most cases, it's better to be simple! Don't abruptly end the story map. Include a statement or slide to close and make the fact that the reader is done easily. Don't forget to trust all the sources you've used in your map. Also paste your signature on the map to make it more personal. Dress up your story map and think about it - when you dress yourself up, you do so depending on the occasion. Apply this same principle when decorating story maps. Make sure that the central theme you use for the story map matches the topic. For example, if you have a calm or serious topic, you might want to go with a dark theme. You can also use transition methods in a cascade of digital story maps to highlight themes. No matter what design elements you incorporate, make sure they are related to the topic. Think outside the box Finally, don't forget to unleash your creativity! You may take inspiration from templates, but it's always better to bring your own style. Story map example Click the worksheet in the set below to view more information or download a PDF. Pdf.
